Learning Simulation on Sustainable Communities

Planit-Sustainability improves leadership and decision-making on sustainable communities.

Planit-Sustainability learning-simulation (resource management game) 'shows' how decisions affect social progress, the environment, AND the economy.

Planit-Sustainability models the life of a community. Teams play different roles and need to make the community more sustainable. Win-win-win solutions need to be negotiated and incidents avoided. Planit-Sustainability brings clarity to complex problems by showing cause & effect and enabling delegates to see the 'big picture'.

Using the learning simulation within your workshop will make issues relevant and 'real'. It enables local authority officers, members and citizens to see interconnections and understand how by working together (including with partners) they can create a sustainable future. The approach creates the opportunity for dialogue and builds relationships and is therefore excellent for team building and community engagement.

Sustainable Communities Objectives:

- Increasing awareness of sustainable development.
- Improving sustainable procurement practices.
- Understanding the issues in terms of cause and effect rather than silo perspective.
- Building community capacity around sustainable communities.
- Improving the implementation of sustainable communities.
- Developing generic skills required for sustainable communities.

Induction / Recruitment
Member Development
Community Engagement
Away days / Team building
Partnership Working
Change / Silos / Transformation
Awareness Raising
Community Leadership
Management Training
Leadership Development

Ease of Use

The learning simulations are easy to use and are supplied with a comprehensive trainer guide. In the simulation all of the purchases, report icons, and score elements can be clicked to reveal how their current status has been calculated and how to improve it.

What you get:

- A branded learning simulation.
- Worksheets and team labels.
- Trainer guide.

Just add a laptop, projector and dry wipe markers, and you're ready to deliver engaging workshops that will get your messages across.
