

Our Portfolio

Our Learning simulations (serious games) allow delegates to explore complex problems. They are computer based and incorporate sophisticated models, but are delivered in workshops facilitated by experts.

Learning simulations are fun and get everyone involved. Players make decisions and get immediate feedback, allowing them to quickly build up authentic understanding.

We have delivered over 450 workshops and trained more than 6,000 people in both the public and private sector.

"The people using it were from all different backgrounds & it allowed them to work together effectively."

Planit-Sustainability

Sustainable Communities | Localism | Partnership / Team Building

Planit-Sustainability 'shows' how decisions affect social progress, the environment, AND the economy. Local priorities need to be delivered with a win-win-win understanding / methodology.

Regen-IT

Neighbourhood Management | Affordable Housing

Regen-IT enables organisations to look at wider issues surrounding housing and regeneration.

Regen-IT learning simulation is recognised by the Homes and Communities Agency

Govern-IT

Member / Officer Working | Member Training | Leadership
Govern-IT models a council. Services, members and external partners need to collaborate to improve finances & outcomes.

Planit-YP

Every Child Matters | Young People Consultation

Planit-YP deals with the complex issues surrounding young people such as teenage pregnancy, anti-social behaviour, worklessness and drugs.

Planit-WASTE

Sustainable Waste Management

Planit-WASTE models areas with different socio-economic and environmental profiles. Teams are judged on sustainability, recycling, landfill allowances, waste arisings and viability.

Planit4CAST

Climate change mitigation and Adaptation

Planit4CAST requires delegates to work together to tackle climate change (develop mitigation and adaptation strategies).

Planit-Shared

Medium Term Gap | Shared Services | More with Less

Planit-Shared models two local authorities. Improvements need to be achieved while dealing with a financial medium term gap - more with less.
